Stand-alone power catwalks

Technical specifications

Herrenknecht Vertical's hydraulic power catwalks automate the transportation of all kinds of tubulars from the horizontal pipe storage on the ground to the rig floor and vice versa, remotely controlled. Thus, safety during handling operations is increased by reducing manual intervention. Tubulars, drill collars and casings are run in a highly efficient way.

The portfolio of stand-alone power catwalks comprises several sizes, suitable for a broad range of rig types. Different configurations according to customer requirements are available upon request.
